

FIGURE 1 – Manibridge Project Location and Planned Drill Program Location

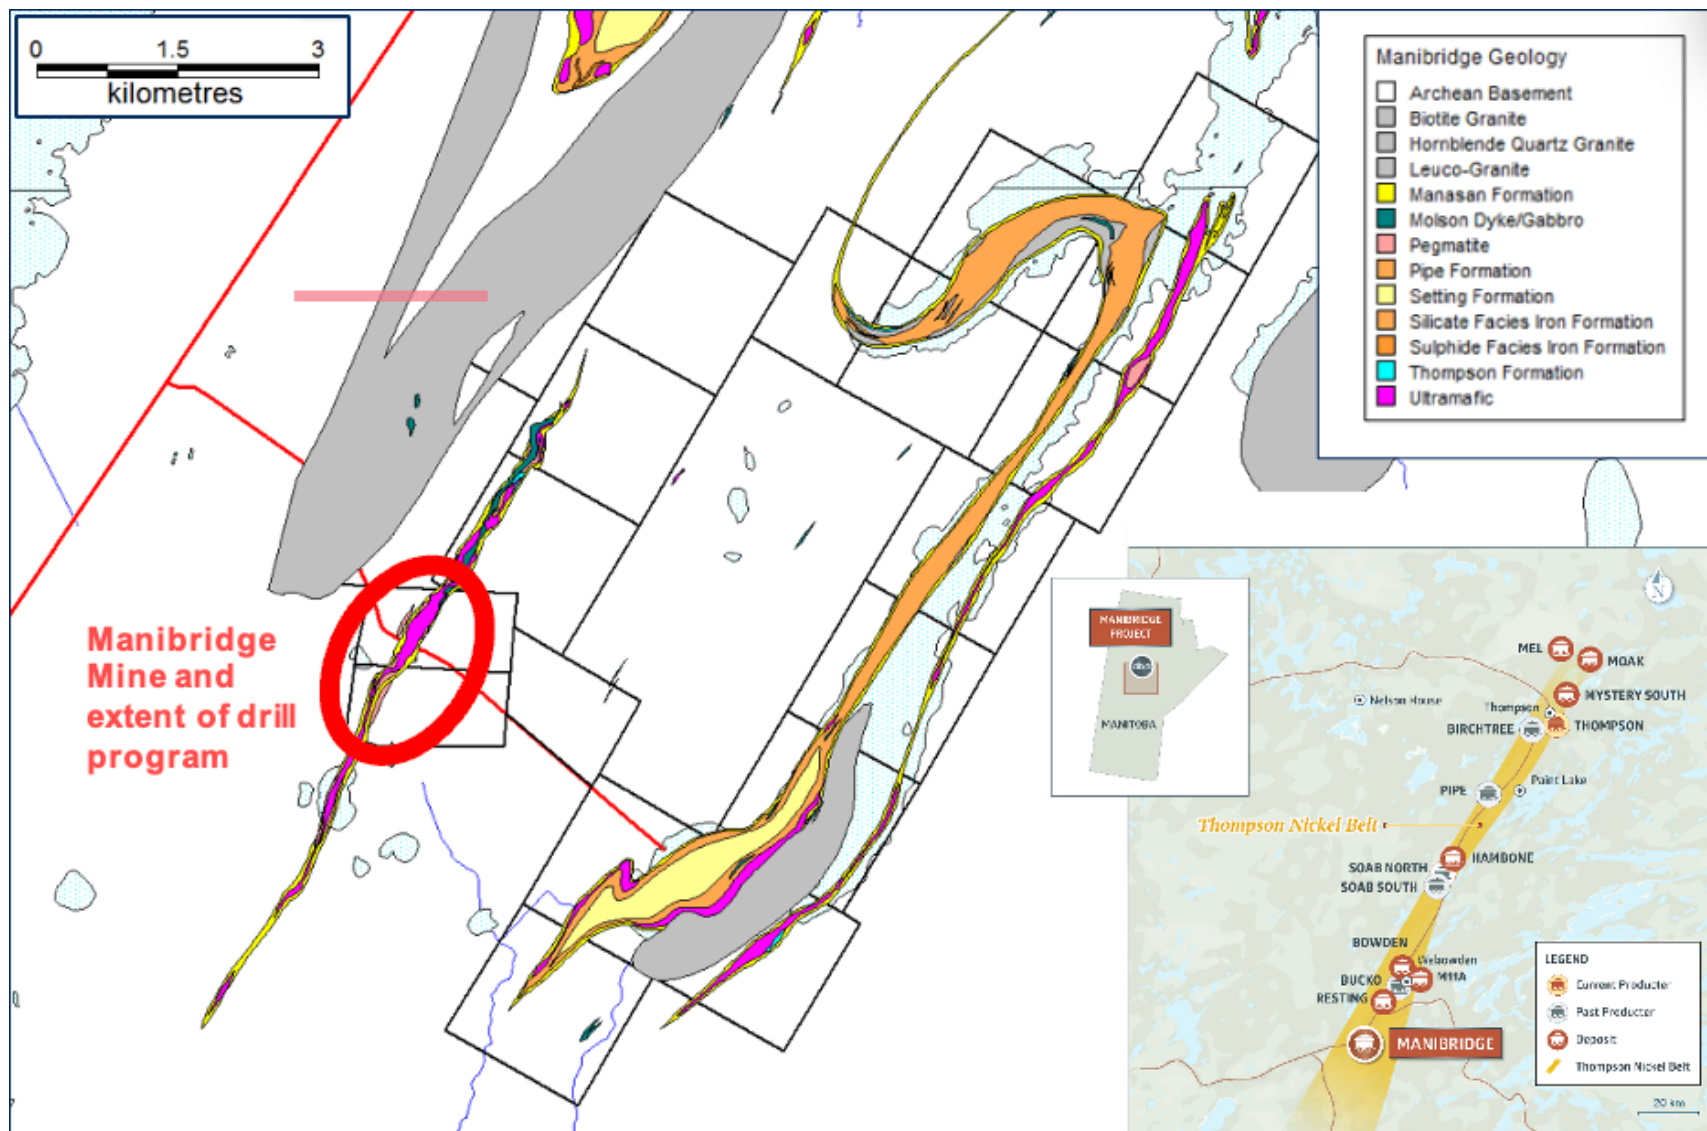

FIGURE 2 – Winter 2022 Drill Holes Within Manibridge Mineralization Shell (looking west)

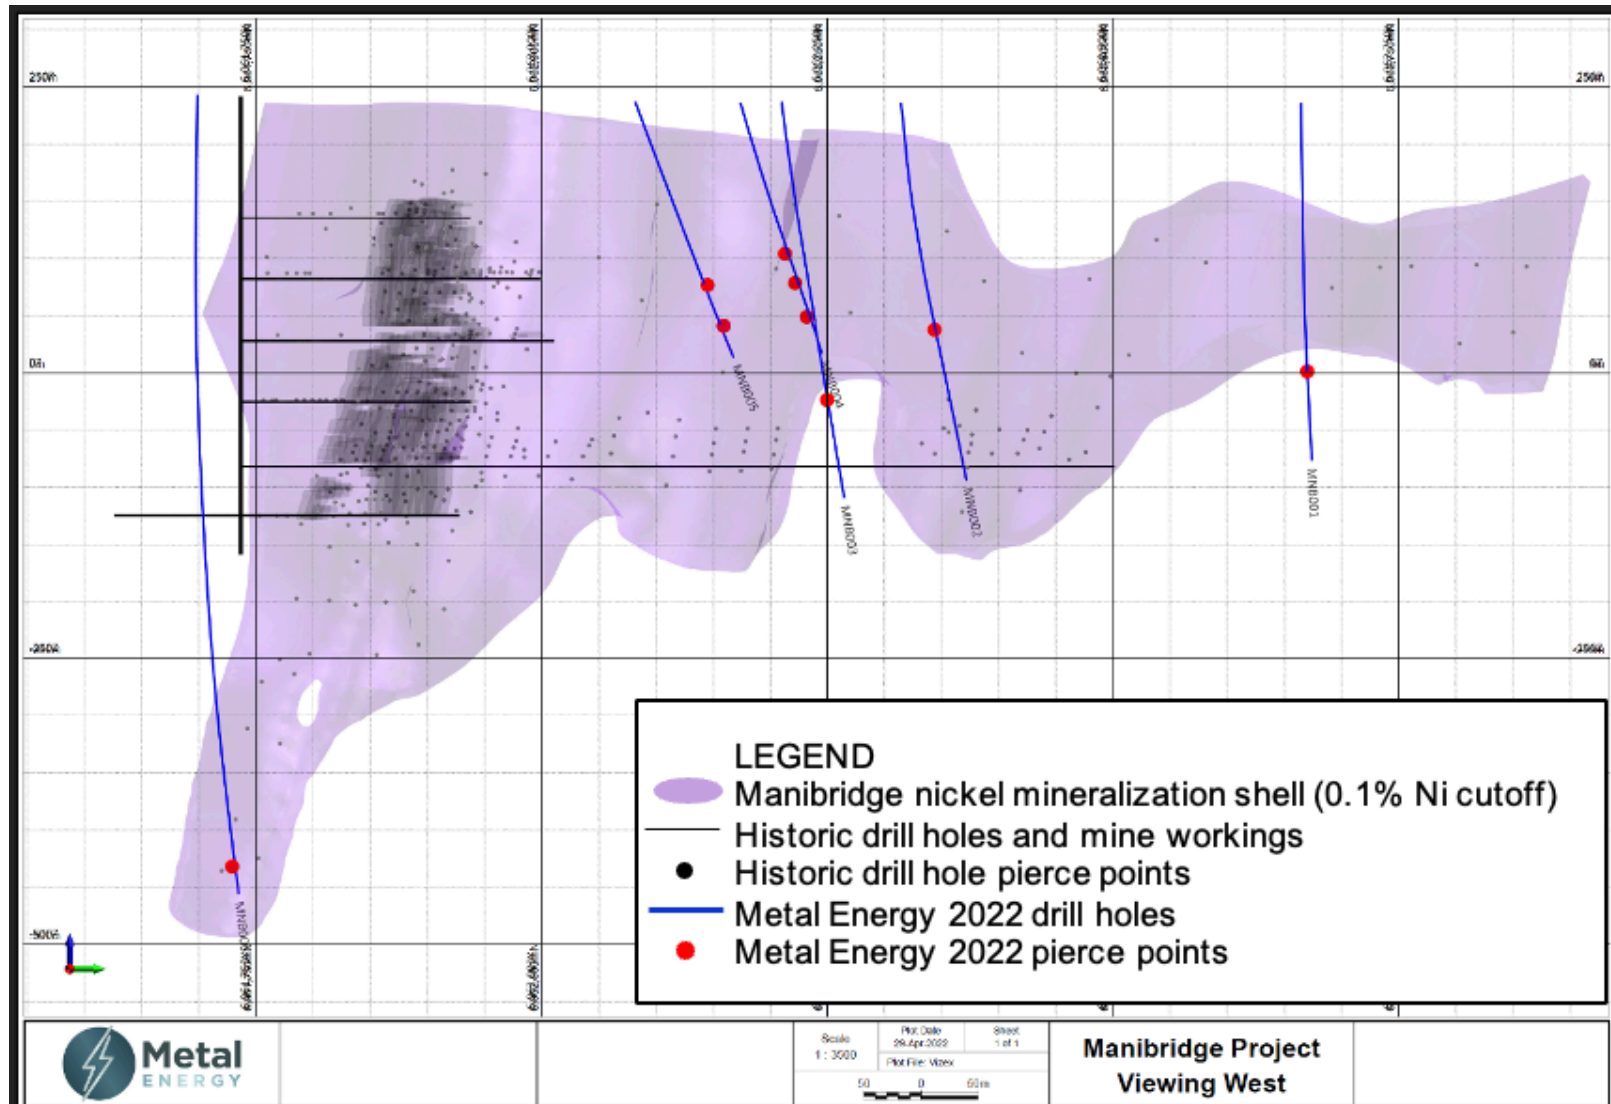

FIGURE 3 – Massive Net-Textured and Brecciated Sulphides (MNB001 at 269.0 m depth)

Table 1 - Winter 2022 Diamond Drill Hole Collar Data and Visible Sulphide Results

DDH	Target Area	East	North	Elevation	Az.	Dip	EOH	hXRF Ni-Cu Sulphides Reported Widths	Assay Results (>0.3 Ni eq.%)
MNB001	Manibridge Mine	511,145	6,062,665	236	272	-71.5	338	247.7 – 264.5 m	Assay results pending
MNB002	Manibridge Mine	510,891	6,062,315	236	293.5	-72.6	352	207.6 – 213.8 m	Assay results pending
MNB003	Manibridge Mine	510,854	6,062,210	237	292	-72.5	369	249.2 – 256.9 m 324.7 – 328.4 m 337.5 – 349.7 m	Assay results pending
MNB004	Manibridge Mine	510,762	6,062,175	236	295	-55.5	272	171.2 – 181.7 m 232.5 – 238.4 m	Assay results pending
MNB005	Manibridge Mine	510,723	6,062,083	237	298	-53.0	284	213.7 – 222.5 m	Assay results pending
MNB006	Manibridge Mine	510,936	6,061,699	244	268	-75.0	735	700.5 – 708.0 m	Assay results pending
6 DDH							2,350	6 DDH	0 DDH

NOTES: East and North units are metres using NAD83 datum, UTM Zone 14N

Elevation is recorded as "metres above sea level"

EOH = end of hole, measured in metres

NA = not applicable
